

Make Up Guidelines

(Steps to follow to apply stage make up)

Important Hints:

- Don't apply heavy. Keep it THIN. You can always add more.
- Always set the make-up with powder as the last step before putting on costume.
- Apply powder between scenes if you are perspiring.
- Don't Waste!! You should get 50 applications from the average cream stick or pancake.
- If you have allergies, you will need to buy hypo-allergenic make-up.
- If your make-up is complicated (old age, etc.), get here early.
- Remove makeup with cold cream (Noxema), soap and water, or makeup removal towelettes (available at the pharmacy).

STEP BY STEP INSTRUCTIONS:

Step 1: Wash your face and apply an astringent to close pores.

Step 2: Apply moisturizer to dry patches only if needed.

Step 3: Apply foundation

- Cream: Apply thinly and evenly using foam wedge. Apply to entire face, ears, and neck, – anything that is not covered gets foundation. Don't forget eye lids and corners of eyes.
- Pancake: Get a small bowl with some water in it. Get a foam wedge wet and squeeze out water. Rub on pancake to pick up foundation. Apply quickly and evenly. You've got to work fairly fast, as it sets quickly. Don't try to spread dry foundation. Just add more. Keep wetting and squeezing sponge as it dries up. Beware of blotchiness!

Beginners Stop Here - - Have a veteran assist you with the details!

Standard Male: All these details are very subtle. Don't overdo it!

- Cream rouge to cheekbones
- Remove dark circles under eyes w/ highlight color
- Highlight nose
- Shadow sides of nose and a bit underneath nose
- Shadow under chin and jaw line
- Slight shadows under eyebrows
- Eye liner
- Natural lip color if lips are pale
- Powder (if using cream foundation). Remove excess with brush.
- Check with Mr. Logee for approval

Standard Female: All these details are very subtle. Don't overdo it!
